ARCO HONORS GEOTECHNOLOGY AS TOP VENDOR FOR 2005

Geotechnology was recently chosen as one of ARCO Construction's top vendors for 2005. Of more than 500 vendors including suppliers, consultants and subcontractors, Geotechnology is being recognized as one who consistently rises above the others and exceeds expectations. ARCO has honored outstanding vendors annually for the past ten years for their impressive efforts and contributions to ARCO projects.

"It is gratifying to be recognized by ARCO for our efforts in helping their projects be successful. We work very hard to provide innovative and reliable geotechnical, environmental and materials testing solutions for our clients and it really energizes us to receive this kind of recognition from our loyal clients like ARCO," said Ed Alizadeh, president of Geotechnology.

Geotechnology is proud to have provided ARCO Construction with responsive and quality services for the past 15 years. In 2005, Geotechnology provided exceptional geotechnical, environmental, and construction materials testing services on these ARCO projects: Mason Ridge Office Park, Principia College Field House, the new Ashley Furniture store in O'Fallon, Missouri, Lambert Pointe Building F, Mid USA Motorcycle Parts Office & Warehouse, Laboure Centre and Andy's Seasonings.

Geotechnology, Inc., is a professional corporation offering a comprehensive range of consulting services in applied earth and environmental sciences, including geotechnical and environmental engineering, materials testing, geophysics and drilling. Geotechnology is headquartered in St. Louis, Missouri, and has offices in Collinsville, Illinois, and Overland Park, Kansas.
