FOR IMMEDIATE RELEASE

Geotechnology Chief Elected President of National Association of Leading Engineering Firms

ST. LOUIS (April 23, 2008) -- Edmond D. "Ed" Alizadeh, P.E., Esq., President and CEO of St. Louis-based **Geotechnology, Inc.**, is the new president of ASFE/The Best People on Earth. ASFE is a not-for-profit association of "earth- engineering" firms that develops programs, services and materials its member firms use to enhance the quality of their business practices.

ASFE/The Best People on Earth is comprised of the nation's top engineering firms providing services such as geotechnical, environmental and civil engineering; infrastructure and infrastructure security design; geology, biology, ecology, and archeology; brownfields revitalization; construction and program management; and construction materials engineering and testing.

Mr. Alizadeh is a 1984 petroleum-engineering graduate of the University of Tulsa, and in 1989 joined Geotechnology, Inc., a firm founded by his father, the late Mike Alizadeh. He became the firm's environmental department manager in 1994 and maintained that role while attending the St. Louis University School of Law. He earned his Juris Doctorate in 1996, and was soon thereafter named Geotechnology's president.

Mr. Alizadeh is actively involved with community organizations, especially Kids in the Middle, a St. Louis-based group that counsels children and parents in families undergoing transition, divorce in particular.

Geotechnology, Inc., is an employee-owned, professional corporation offering a comprehensive range of consulting services in applied earth and environmental sciences, including geotechnical and environmental engineering, materials testing, geophysics and drilling. Geotechnology has provided expertise on nearly every major construction project in the region, including the new Busch Stadium, Lambert Airport expansion and Ameristar Casino St. Charles. Geotechnology, Inc. is based in St. Louis, Missouri and has offices in Collinsville, Illinois and Overland Park, Kansas. Geotechnology has 120 employees and recorded \$14.8 million in sales in 2007.
