**FOR IMMEDIATE RELEASE**

## **GEOTECHNOLOGY CONSOLIDATES SERVICES INTO NEW, CUSTOM-DESIGNED FACILITY**

ST. LOUIS (October 1, 2006) --- Geotechnology, Inc., a leading provider of consulting services in geotechnical and environmental engineering, materials testing and drilling, has moved to a new, state of the art facility near Westport Plaza.

The move brings the company's offices, drill shop and testing labs into one, state-of-the-art facility at 11816 Lackland Rd., (Suite 150) in Maryland Heights. Prior to the move, Geotechnology operated out of three separate locations – Grissom Dr. and Millwell Ct. in Maryland Heights, and South 7<sup>th</sup> St. in St. Louis's Souldard neighborhood.

“We continue to grow at a strong and steady rate,” said Ed Alizadeh, president of Geotechnology. “By operating out of a single facility, we can serve our clients more effectively by efficiently providing the consulting and engineering services they need at every phase of their project, from project conception through construction.”

In addition to its St. Louis headquarters, the company operates offices in Overland Park, Kansas and Collinsville, Illinois. The Collinsville location will soon be expanded to include a materials testing laboratory and additional personnel.

*-more-*

Geotechnology, Inc., is an employee-owned, professional corporation offering a comprehensive range of consulting services in applied earth and environmental sciences, including geotechnical and environmental engineering, materials testing, geophysics and drilling. Geotechnology has provided expertise on nearly every major construction project in the region, including the new Busch Stadium, Lambert Airport expansion and Pinnacle's "St. Louis City" Casino. Geotechnology, Inc. is based in St. Louis, Missouri and has offices in Collinsville, Illinois and Overland Park, Kansas. Geotechnology has 120 employees and recorded \$13.2 million in sales in 2005.
